DETAILED ACTION

1. Claims 1-18 are pending in this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 15-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Support is not found for the following recitations: Claims 15 and 16 recite "non-straight boundary", claim 17 recites the clear and non-clear regions and gaps and claim 18 recites the strip covering the position of the column. The figures depict the strip but not the further recitation of the covering of the column. The figures do not depict the limitations as recited in the claims.

Art Unit: 1756

Allowable Subject Matter

4. Claims 1-14 are allowed. The claims have been amended to recite that the pattern reproduces the pattern of the first mask. Leroux teaches the final pattern is different from the first mask since the pattern is created by shifting the mask.
